SUMMARY

Recent graduate with a strong foundation in web applications and data structures & algorithms, combined with hands-on project experience. Skilled in developing scalable web services and collaborative software solutions. Passionate about creating user-centric applications that solve real-world challenges and eager to contribute in a team-oriented environment.

EDUCATION

Bachelor of Technology in Computer Science & Engineering : 7.98 CGPA CMR College of Engineering & Technology	2020 – 2024 Hyderabad, India
Intermediate : 94.2 % Sri Chaitanya Junior Kalasala	2018 – 2020 Hyderabad, India
SSC : 8.8 CGPA Keshava Reddy Concept School	Sangareddy, India

SKILLS

Front-end Technologies HTML,CSS,Javascript,ReactJs,Tailwind CSS	Back-end Technologies Express.js,Node.js,Firebase,MongoDB
Tools & Methodologies Git, REST APIs, Postman, MVC Architecture, Redux	Programming Language Java

PROJECTS

- NoteApp** 🔗
- Developed a note management app using React and Redux, enabling users to create, update, delete, and pin notes.
 - Implemented search functionality to enhance note accessibility and usability.
 - Utilized Firebase for real-time data storage and retrieval, incorporating Google authentication and email/password sign-in features.
- Job Portal** 🔗
- Implemented features for job search, application management, and employer engagement to facilitate interaction between candidates and employers.
 - Emphasized reliability and scalability, ensuring a robust application capable of handling multiple users and requests.
 - Utilized Node.js, Express.js for backend development, with EJS for dynamic content rendering, providing a seamless user experience.
- Wristly** 🔗
- Developed a sophisticated e-commerce platform for wristwatches, leveraging Redux Toolkit for efficient global state management.
 - Enabled users to add items to their wishlist and view detailed descriptions of each watch to enhance their shopping experience.
 - Implemented a shopping cart feature that allows users to adjust quantities and view the total sum conveniently.
- Postaway** 🔗
- Developed a robust RESTful API for a social media platform, enabling secure user authentication and OTP-based password reset.
 - Utilized JWT for secure user authentication and provided functionalities for creating, updating, and deleting posts while allowing users to interact with others through likes and comments.
 - Built with modular code for scalability and ease of maintenance, optimizing performance with features like pagination and post filtering for improved user experience.
