Projects

Job Portal ⧉
Introducing our innovative Job Portal – one-stop solution for streamlining the job application process! Our platform revolutionizes the way job seekers connect with employers, making job hunting a seamless and efficient experience for everyone involved.

E-Commerce ⧉
Frontend for an e-commerce site using React and Redux with data persistence. Interacts with a dummy API via My JSON Server, featuring product management, cart, and notifications.

Postaway ⧉
Developed a robust RESTful API for seamless social media interactions, encompassing user authentication, post and comment management, like functionalities, and friendship features. Users can securely update profiles and reset passwords via OTP, all implemented with code modularity for maintainability and scalability.

Habit Tracker ⧉
Track and manage your daily habits effortlessly with our intuitive Habit Tracker. Set up multiple habits, toggle between statuses, and view your progress over seven days. No authentication required—simply add habits and start tracking.
